Target Roles: AI Cybersecurity SME; Product Security & Governance; Emerging Risk (Remote)

Executive Summary

Principal-level security architect with 25+ years across cloud, enterprise, and government-regulated environments. Deep experience operationalizing **governance, risk, and compliance** for AI/ML and cloud services: SOC 2 readiness, threat modeling, control baselines, exceptions/remediation, and executive-level assurance. Proven delivery with **NIST 800-53/FedRAMP, ISO/IEC 27001/27002**, PCI DSS v4, CMMC, and SP 800-171. Hands-on partnering with engineering, legal, and auditors to make policy **usable** and evidence **repeatable** for highly regulated customers (public sector, financial services, healthcare, technology).

Core Skills

- **AI/ML Security:** governance & risk management; model lifecycle controls; data protection & privacy; abuse/misuse scenarios; prompt-injection and data leakage defenses; secure LLM application patterns; policy-to-control mapping.
- **Cloud Security:** AWS, Azure; identity & access; encryption/key management; network segmentation; monitoring/telemetry; incident & vulnerability management; secure SDLC gates; evidence pipelines.
- **Frameworks & Standards:** NIST 800-53, SP 800-171, ISO/IEC 27001/27002, FedRAMP, PCI DSS v4, CMMC, HIPAA; MITRE ATLAS; policy/standards lifecycle; conformity assessment (e.g., SOC 2 Type II).
- **Operations & Integration:** architecture reviews/ARB; exception workflows; remediation leadership; API/log integrations; automation and orchestration within delivery toolchains.
- **Collaboration & Leadership:** cross-functional influence (Engineering, Risk, Audit, Legal, Product); executive communications; customer/partner advocacy; standards engagement (INCITS/ISO/IEC).

Experience

Intel - Principal Cloud Security Researcher (AI Cloud)

May 2024 - Jul 2025 | Dallas, TX

- Led **SOC 2 Type II** readiness for an AI cloud platform; built an evidence program and integrated controls into **SDL** checkpoints without impeding delivery.
- Conducted **threat modeling** for control-plane and customer-facing AI services; identified abuse cases relevant to LLMs and data privacy; aligned mitigations to enterprise controls.
- Operationalized **exception intake/closure** and remediation tracking to reduce repeat findings and improve auditor confidence; authored executive-level security & assurance whitepapers for customers.

Impact: Accelerated assurance for regulated customers; improved control adoption and evidence quality across teams.

VMware - Principal Security Engineer

Jan 2021 - Jan 2024 | Dallas, TX

- Consolidated **1,800+ security requirements** → **<100 engineerable controls** mapped to FedRAMP HIGH, PCI DSS v4, CMMC v2, and SP 800-171r2; tied to SDLC gates and evidence examples.
- Unified inputs from security, compliance, privacy, and product into a **single service review**; reduced development rework and increased audit readiness.
- Drove organizational engagement with **INCITS and ISO/IEC** to align product and platform positions with evolving international standards.

Impact: Faster throughput, consistent governance, cleaner audits across services and products.

Caveonix - Chief Security Architect

Nov 2018 - Oct 2020 | Dallas, TX

- Built an **empirical cloud risk model** prioritizing remediation by asset criticality and exposure; integrated with CSPM/CWPP.
- **Integrated 23 global frameworks** with NIST alignment to streamline multi-regulatory compliance for regulated customers.

Impact: Reduced design-time compliance gaps and time to adapt to new mandates.

Oracle Cloud - Cloud Security Architect

Nov 2017 - Nov 2018 | Dallas, TX

- Assessed and enhanced **threat, incident, and vulnerability management** programs for OCI/OCC in regulated enterprise environments; delivered actionable improvements for tooling and operations.

Amazon Web Services - Senior Cloud Security Architect

Nov 2016 - Nov 2017 | Dallas, TX

- Trained Fortune-100 customers on cloud security fundamentals: shared responsibility, identity/least privilege, defense-in-depth, and governance alignment; executed **post-breach** assessments with prioritized risk reduction.

VMware - Global Strategist, Product Compliance & Cybersecurity Solutions

Aug 2015 - Nov 2016 | Dallas, TX

- Secured **\$10M** and led a **FedRAMP Moderate** reference build at **NIST NCCoE** (multi-party partners); authored reference architectures and applicability guidance (encryption, configuration, vulnerability management, firmware integrity).

VCE - Senior Security Product Manager

Feb 2011 - Jul 2015 | Dallas, TX

- Customer-facing security evangelist across compute/network/storage; **\$700M+** in tracked revenue influence; baseline control integration across VMware, Cisco UCS, and EMC stacks.

Earlier Career

- **Critical Start - Principal Consultant (Oct 2008 - Dec 2010):** PCI-DSS breach remediation, digital forensics, security awareness; coordinated with QSAs and acquirers.
- **Accudata - Security Solutions Architect (Oct 2009 - Nov 2010):** SOWs for PCI/HIPAA/NERC/FISMA; integrated partner controls (RSA Archer, DLP, etc.).
- **Texas Instruments - Senior Security Architect (Jul 2001 - Apr 2006):** SOX & enterprise audits; hardware-based mobile app security model; global policy and security solutions.
- **U.S. Navy - Nuclear Propulsion (Nov 1991 - Aug 1999):** NR-1 and USS Nebraska (SSBN-739B); zero-error operational discipline in regulated environments.

Thought Leadership

- **Amazon Author:** *Hacking Exposed: Computer Forensics and IT Auditing: Using Controls to Protect Information Assets* (McGraw-Hill) <https://www.amazon.com/author/chrisdavis>
- **Blog:** articles on compliance, audit readiness, and governance best practices <https://www.cloudauditcontrols.com>
- **Free materials:** free compliance and governance resources <https://github.com/davischr2/Cloud-Documents>
- **Speaker** at RSA, BlackHat, VMworld, CSA, SANS, ISACA chapters
- **Adjunct Professor**, 10 years teaching cybersecurity, auditing, and risk management

Education & Certifications

- **MBA (Information Security)** - University of Texas at Austin
- **BS (Nuclear Engineering Technologies)** - Thomas Edison State College
- **Certifications:** CISSP • CISA • CCISO • PCI-ISA • ITIL-F • CCSK • CCNP

Tools & Platforms

AWS • Azure • OCI • Identity/IAM • Key management/KMS/HSM • Network security (segmentation, TLS) • Vulnerability/patch management • Incident response/forensics • Policy/standards repositories • Ticketing & workflow (reviews, exceptions, remediation) • Logging/telemetry (SIEM, EDR) • API integrations and automation within delivery pipelines
